27     INNER JOIN Account AS a ON a.AccountID = gl.AccountID
28 WHERE gl.PostingDate <= (SELECT AsOfDate FROM Params)
29     AND NOT (gl.VoucherNumber IN (SELECT EntryNumber FROM Closes)
30         AND gl.PostingDate = (SELECT AsOfDate FROM Params))
```

	AccountNumber	AccountName	AccountType	AccountSubType	Balance	DebitBalance	CreditBalance	Postings
1	1010	Cash and Cash Equivalents	Asset	Current Asset	8442255.8	8442255.8	0	56380
2	1020	Accounts Receivable	Asset	Current Asset	4798804.32	4798804.32	0	48447
3	1040	Inventory - Finished Goods	Asset	Current Asset	12169701.74	12169701.74	0	50209

Execution finished without errors.
Result: 71 rows returned
At line 8:
WITH Params AS (

Outlined in teal: the test that leaves out a close only when it is dated on the as-of date. Outlined in coral: the cash row. The grid shows the first 3 of 71 rows; the debit balances add up to 67,107,722.36, equal to the credit balances. The editor is scrolled to the query's CTEs and WHERE clause: its two comment lines are above the part drawn, and its GROUP BY and ORDER BY lines below.
